KOREA EXCHANGE

Regulators all over the world are trying to strengthen financial regulatory system for preventing a recurrence of the crisis such as in 2008. As for OTC derivatives market regulations, the global financial crisis has prompted calls for new oversight. Together with this world-wide movement, Korean financial authorities also make an effort to improve the resilience of derivatives markets. However, some market participants worry that new regulation may hinder the development of one of the most successful exchange-traded derivatives markets in the world. Under these circumstances, a special symposium entitled 'Recent regulatory issues in the Korean exchange-traded derivatives markets' is timely prepared for APAD 2012 meetings. Korea Derivatives Association and Korea Institute of Finance are co-hosting this symposium. We cordially invite you to join us for this timely event. We look forward to your valuable comments and contributions.
